## PROCESSING PERFORMANCE RATINGS

### 2015 Performance Management Reports

REPORT	TITLE/CONTENTS/GENERAL DESCRIPTION	SUGGESTED USAGE/OTHER COMMENTS
PM9495	<p style="text-align: center;"><u>PM LOAD LISTING</u></p> <p>Provides a listing of employees with a Performance Increase (PI) Eligibility date of 11/25/2015. Only employees with this date will be loaded to the Performance Management (PM) database. Ratings can be entered only for employees listed on this report.</p>	Agencies should use this report in conjunction with report PM9970 , "PI Eligibility Dates Not 11/25/2015" to verify that the PI Eligibility date is correct for all employees who should receive a rating for this cycle. Please review the "Pay Schedule" field displayed on Report PM9495. This value indicates the number of times the employee is paid per year.
PM9970	<p style="text-align: center;"><u>PI ELIGIBILITY DATES NOT 11/25/2015</u></p> <p>A rating cannot be entered until an employee's PI Eligibility date is 11/25/2015. If you have received a copy of this report, these records should be investigated as to the reason for the PI Eligibility date, and if appropriate, brought up-to-date by submitting a P3 to this office for corrective action. The PM database will not reflect the updated eligibility date until a reload of the PM database is performed.</p>	Agencies should use this report to validate the PI Eligibility dates of the employees listed. PI Eligibility dates earlier than 11/25/2015 are probably errors and should be sent to DHRM for correction.
PM9535	<p style="text-align: center;"><u>RELOAD EVALUATION RATINGS</u></p> <p>The PM database is reloaded periodically to capture current employee status. This report provides an employee listing of those with previously entered ratings that were retained during the reload. An exception report, "Reload Ratings Exception List," is also provided if ratings were not retained. For example, employees who have separated from state service are deleted from the PM database during the reload process and reinstated employees are added.</p>	Agencies may use this report to confirm that evaluation data previously entered has been retained. (The rating code itself may be suppressed on this report.) The record change indicator 'Y' means the employee changed agency. The record change indicator 'L' means the employee has not been rated and still has the 'L' rating code. A blank record change indicator means there was no significant change to report since the last reload.
PM5115	<p style="text-align: center;"><u>SALARY ADJUSTMENT ELIGIBILITY LISTING</u></p> <p>Though no increases are approved, PM5115 will list employees rated Contributor or higher. This report will also sum the current salaries by sub-unit and agency. PM5115 is scheduled to begin with the November 16<sup>th</sup> Performance Management database reload.</p>	Agencies should use this report to confirm that the correct employee information has been captured and that the current salaries are correct for their employees.
PM5125	<p style="text-align: center;"><u>SALARY ADJUSTMENT EXCEPTION LISTING</u></p> <p>Though no increases are approved, PM5125 will list employees whose records cannot be updated or whose records require maintenance for the specified reasons. Also lists employees rated Below Contributor. The PM5125 report is scheduled to begin with the November 16<sup>th</sup> Performance Management database reload.</p>	Agencies should review the reasons noted and initiate appropriate corrective actions.
